

**Vendor:** IBM

**Exam Code:** LOT-911

**Exam Name:** IBM WebSphere Portal 8.0 Solution  
Development

**Version:** DEMO

**QUESTION 1**

The Java Portlet Specification PLT.C appendix defines the Cascading Style Sheet classes for a variety of logical units in the markup. It follows the styles defined by the OASIS Web Services for Remote Portlets Technical Committee. What is the prefix used for the name of the CSS classes defined in this appendix?

- A. css- (for example css-font, css-form-field, css-table-body)
- B. wsrp- (for example wsrp-font, wsrp-form-field, wsrp-table-body)
- C. portal- (for example portlal-font, portal-form-field, portal-table-body)
- D. portlet- (for example portlet-font, portlet-form-field, portlet-table-body)

**Answer: D**

**QUESTION 2**

Evan wants to develop a portlet to act as a target using Click-to-Action. He wants to develop a client-side click-to-action handler. Which best describes the ways that he can get the source data submitted by the source portlet?

- A. He can retrieve the source form and the input inside from the page Document Object Model.
- B. He can retrieve the source data from the window.ibm.portal.c2a.event.value global variable.
- C. Either of the above.
- D. None of the above.

**Answer: C**

**QUESTION 3**

The following section of a portlet deployment descriptor defines the cache setting for a portlet:

```
<expiration-cache>300</expiration-cache>  
<cache-scope>private</cache-scope>
```

What is the meaning of this cache definition?

- A. The content should be cached for 300 seconds and must not be shared across users.
- B. The content should be cached for 300 milliseconds and must not be shared across users.
- C. The content should be cached for 300 seconds and can be shared across users.
- D. The content should be cached for 300 milliseconds and can be shared across users.

**Answer: A**

**QUESTION 4**

What is Enabler API used for?

- A. You can use it only for manipulating user preferences on the client side.
- B. You can use it only for manipulating user profiles on the client side.
- C. You can use it only for manipulating user profiles and portlet preferences.
- D. You can use it for working with portlet preferences, user profiles, and the portlet state including the portlet mode, the window state, and so on.

**Answer: D**

**QUESTION 5**

Which of the following statements is true?

- A. Changing state of the portlet is not allowed during the `serveResource()` method.
- B. You can change portlet mode and window state during the `serveResource()` method.
- C. You can set new render parameters during the `serveResource()` method.
- D. You can set portlet preferences during the `serveResource()` method.

**Answer: D**

**QUESTION 6**

Which of the following options is an advantage of using JSR 286 events over public render parameters or `application_scope` session attributes?

- A. A user can bookmark the URL with the event information.
- B. Objects can only be shared between portlets in the same application.
- C. Complex object types can be shared across web applications.
- D. Using events over public render parameters avoids the additional process event call.

**Answer: C**

**QUESTION 7**

Robert needs to support a language that is read from left-to-right. Which tag would he use?

- A. `<portal-fmt:bidi/>`
- B. `<portal-fmt:answer/>`
- C. `<portal-fmt:textParam/>`
- D. `<portal-fmt:identification/>`

**Answer: A**

**QUESTION 8**

Jim has to modify a theme policy to customize the `renderMainMenu` attribute to satisfy a project requirement to disable the main menu. Which one of the following theme policies can be used?

- A. Palette
- B. Default
- C. Federation
- D. `SingleTopNavLevel2`

**Answer: B**

**QUESTION 9**

From what source does the Page Builder theme instantiate drag-and-drop functionality in terms of portlets?

- A. The `<dnd:drag/>` and `<dnd:drop/>` tags.

- B. The theme Default.jsp sets parameters for the `ibmPortalConfig` object that define the drag-and-drop behaviors for dragging portlets.
- C. The Page Builder theme does not support drag-and-drop for portlets.
- D. The theme Default.jsp instantiates drag-and-drop functionality by means of loading `ibmCSA.js` and calling `instantiateDrag()`.

**Answer: B**

#### **QUESTION 10**

Which of the following options is a true statement about layout templates?

- A. If you change the layout template, it gets reflected in all pages that use that template directly.
- B. If you change the layout template, it does not get reflected in all pages that use that template, and you have to synchronize the layout template.
- C. If you change the layout template it does not get reflected in all pages that use that template, you have to change it manually at the page level.
- D. After the layout template is applied to page, you cannot change it.

**Answer: B**
