

Exam Code: LOT-954

Exam Name: IBM Lotus Notes Domino

Vendor: IBM

Version: DEMO

Part: A

1: Qiang needs to add a button to the Contact XPage. When clicked, this button should delete the currently open document from the application. What is one way that Qiang can add this button?

A. Drag the Data control from the core controls onto the XPage canvas. From the Control properties, set the Label to Delete. On the Operations tab, select Current document and Delete.

B. Drag the Data control from the core controls onto the XPage canvas. From the Control properties, set the Label to Delete. In the Options area of the properties, select Delete for the Action, and select Domino Document for the Target.

C. Drag a Button control from the core controls onto the XPage canvas. From the Control properties, set the Label to Delete. On the events panel, select the Mouse onclick event, and add a server-side simple action. Select Delete for the action.

D. Drag a Button control from the core controls onto the XPage canvas. From the Control properties, set the Label to Delete. On the events panel, select the Mouse onclick event, and add a client-side simple action. Select Delete for the action.

Correct Answers: C

2: Kimberly has added a submit button to her XPage. Before the document is saved, she wants to make sure that the user actually wants to save the document. What should she do to accomplish this task?

A. Add a Save Document core control to the form.

B. Add a Confirm Action core control to the form.

C. Add a Confirm Action simple action on the button onclick event.

D. Add a Save Document simple action to the button onclick event.

Correct Answers: C

3: Emil has a data table in his XPage. He has identified the data table's data source as a particular Domino View Data Source. He has also inserted the columns he needs. How can he assign each column to a matching column from the Domino View?

A. Drag a View control onto the data table and define its columns.

B. Select the data table and define its data binding to include all of the View's columns, in the appropriate order.

C. Right-click each column, select "Data Binding" from the context menu, and identify the appropriate column in the Domino View.

D. Drag the appropriate controls from the Controls View onto the columns in the data table and define their data bindings to the individual columns in the Domino View.

Correct Answers: D

4: From the menu bar of Lotus Domino Designer, Pieter clicked Create > Design > Custom Control. He created an element that he named PageBanner. How can Pieter now add PageBanner to his XPage?

A. From the Controls view, expand Custom Controls if it is collapsed. Drag PageBanner onto the desired location on the XPage canvas.

B. From the applications navigator, expand the Custom Controls section if it is collapsed. Drag

PageBanner to the desired location on the XPage canvas.

C.Position the cursor at the desired location on the XPage canvas. Right-click and select Insert > Shared Element > Control > Custom Control > Page Banner.

D.Position the cursor at the desired location on the XPage canvas. Select Create > Resource > Insert Resource. Select "Custom Controls" for the Resource type and select PageBanner.

Correct Answers: A
