

**Exam Code:** 9L0-507

**Exam Name:** Mac OS X Server Essentials v10.4 Exam

**Vendor:** Apple

**Version:** DEMO

## Part: A

1: You are offering FTP services over the Internet to users who may be behind a firewall. You should advise users to enable passive FTP if they are behind a firewall that \_\_\_\_\_.

- A.requires SFTP
- B.has FTP tunneling disabled
- C.does not allow FTP connections
- D.does not allow all FTP connection modes

**Correct Answers: D**

2: Which task can you perform remotely with Remote Desktop that you CANNOT accomplish locally using Server Admin?

- A.Start and stop services on the server.
- B.Administrate a server without a monitor.
- C.Administrate multiple servers simultaneously.
- D.Configure an additional Ethernet port on the server.

**Correct Answers: D**

3: In Mac OS X Server, you configure password policies in \_\_\_\_\_. (Choose TWO.)

- A.Workgroup Manager, at the basic user panel
- B.Workgroup Manager, as an advanced user option
- C.Workgroup Manager, as part of Accounts preferences
- D.Server Admin, as part of Directory Services settings
- E.Server Admin, as part of Open Directory settings

**Correct Answers: B E**

4: You have defined managed preferences for the Guest Computers account in Workgroup Manager. Those preferences apply to \_\_\_\_\_.

- A.computers named on the Guest Computers list only
- B.any bound computer from which a user connects to the server with Guest access
- C.any bound computer that is not a member of a named computer list on the server
- D.computers that are members of computer lists that have Guest access to the server

**Correct Answers: C**

5: Which statement is true of the Software Update service in Mac OS X Server v10.4?

- A.It restricts access to updates based on Ethernet addresses.
- B.It can be configured to automatically download all updates from Apple, but serve only selected updates.
- C.It allows you to create software update packages and distribute them on a local network, alongside updates provided by Apple.
- D.Turning it on prevents users from accessing Apple's update server directly, and restricts them to your server for Apple software updates.

**Correct Answers: B**

6: Which three password policy options can you select in Mac OS X Server v10.4? (Choose THREE.)

- A.Log failed login attempts.
- B.Use Kerberos passwords.
- C.Use Clear Text passwords.
- D.Establish password criteria.
- E.Set length of expiration intervals.
- F.Identify password storage location.

**Correct Answers: A D E**

7: Sharing files over NFS is NOT secure because NFS \_\_\_\_\_.

- A.relies on Kerberos
- B.uses Clear Text passwords
- C.uses MAC address authentication
- D.does not require user authentication

**Correct Answers: D**

8: Where on a client machine is managed client data stored after the user logs in?

- A./Library
- B./System/Library
- C./Library/Preferences/
- D.~/Library/Preferences/

**Correct Answers: D**

9: The primary role of shadow files in NetBoot is \_\_\_\_\_.

- A.to allow the client to boot diskless
- B.to provide a temporary writable space
- C.to allow NetBoot to run in read-only mode
- D.to allow NetBoot clients to edit the NetBoot image

**Correct Answers: B**

10: In Mac OS X Server v10.4 Workgroup Manager, the Often preference lets users \_\_\_\_\_.

- A.make preference setting changes that are persistent
- B.define the number of times a preference setting can be changed
- C.change a preference setting for the duration of their login session
- D.define a calendar schedule for resetting a preference to its default value

**Correct Answers: C**

11: What service can you use in conjunction with a firewall to provide security for your users, while letting them share a single public IP address?

- A.Kerberos
- B.Web Mail
- C.Virtual Private Network (VPN)
- D.Network Address Translation (NAT)

**Correct Answers: D**

12: On a server that has Mac OS X Server v10.4 you configure a firewall that allows web service for the IP address range 10.1.7.6/16 only. Which two of these addresses will be DENIED access to the web server? (Choose TWO.)

- A.10.1.7.6
- B.10.2.7.6
- C.10.1.7.8
- D.10.1.9.6
- E.17.1.7.6

**Correct Answers: B E**

13: In Mac OS X Server, the DHCP client ID \_\_\_\_\_.

- A.authenticates the client to the DHCP server
- B.configures the DHCP server to identify the client's subnet
- C.lets the DHCP server create an encryption key for the client
- D.is an optional tool to let a DHCP administrator uniquely identify clients

**Correct Answers: D**

14: What is the correct order of precedence for Managed Preferences according to the override rule?

- A.Computer List, Groups, User
- B.User, Groups, Computer List
- C.Computer List, User, Groups
- D.User, Computer List, Groups

**Correct Answers: D**

15: What minimum hardware configuration does Apple recommend for Mac OS X v10.3 and for Mac OS X v10.4 NetBoot clients?

- A.Mac OS X v10.3 NetBoot clients: 100 Base-T Ethernet and 128 MB RAM  
Mac OS X v10.4 NetBoot clients: 100 Base-T Ethernet and 256 MB RAM
- B.Mac OS X v10.3 NetBoot clients: 10 Base-T Ethernet and 128 MB RAM  
Mac OS X v10.4 NetBoot clients: 10 Base-T Ethernet and 256 MB RAM
- C.Mac OS X v10.3 NetBoot clients: 100 Base-T Ethernet and 128 MB RAM  
Mac OS X v10.4 NetBoot clients: 100 Base-T Ethernet and 128 MB RAM
- D.Mac OS X v10.3 NetBoot clients: 100 Base-T Ethernet and 256 MB RAM  
Mac OS X v10.4 NetBoot clients: 100 Base-T Ethernet and 256 MB RAM

**Correct Answers: A**

16: Which managed preference is available for Computer List management, but not for Group or User management?

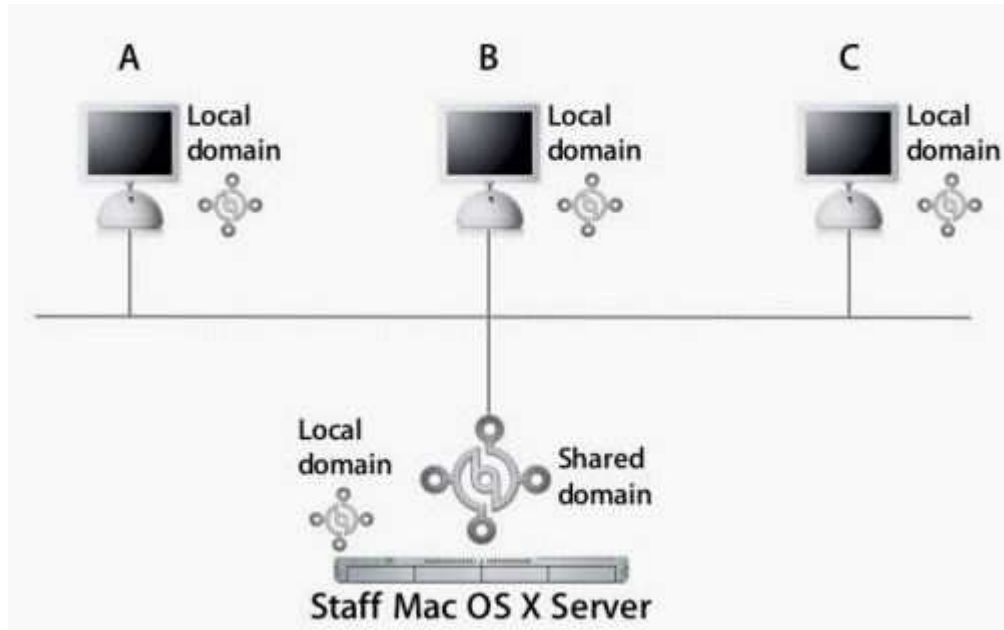

- A.Internet preferences
- B.Application preferences
- C.Energy Saver preferences

D.Universal Access preferences

**Correct Answers: C**

17: Click the Exhibit button and examine the graphic, then answer the question below.

In the graphic, the Staff Mac OS X Server hosts a shared directory domain, to which the three client computers, A, B, and C, are bound. Which two statements are true of this network? (Choose TWO.)

A.The Directory Access application was used on the Staff Mac OS X Server to bind computer A to its parent domain.

B.The Server Assistant application was used on the Staff Mac OS X Server to bind computer B to its parent domain.

C.Users defined in the Shared domain of the Staff Mac OS X Server can log in to computer A.

D.Users defined only in the Local domain of computer C can log in to the Staff Mac OS X Server.

E.Users defined only in the Local domain of the Staff Mac OS X Server cannot log in to computer C.

**Correct Answers: C E**

18: In Mac OS X Server v10.4, what tool lets you share print queues?

A.Server Admin

B.Printer Setup Utility

C.Workgroup Manager

D.Print & Fax pane of System Preferences

**Correct Answers: A**

19: What tool lets you change the role of the Open Directory service in Mac OS X Server v10.4?

A.Server Admin

B.Directory Access

C.Workgroup Manager

D.Open Directory Admin

**Correct Answers: A**

20: In Mac OS X Server v10.4, you should enable strict locking when you share a volume over \_\_\_\_\_.

A.FTP only

B.AFP only

C.SMB only

D.AFP and FTP

E.AFP and SMB

**Correct Answers: E**
