

**Exam Code:** ee0-021

**Exam Name:** atg commerce certification exam

**Vendor:** Exam Express

**Version:** DEMO

## Part: A

1: Which two steps are necessary to add a new shipping method? (Choose two.)

- A.create a component of type atg.commerce.pricing.ShippingMethod
- B.create a component of type atg.commerce.pricing.FixedPriceShippingCalculator
- C.add the new shipping method component to the ShippingPricingEngine component's preCalculator property
- D.add the new shipping method component to the ShippingPricingEngine component's shippingMethod property

**Correct Answers: B C**

2: What are two functions of the CartModifierFormHandler? (Choose two.)

- A.reprices the Order
- B.adds items to an Order
- C.schedules the Order for future fulfillment
- D.retrieves the list of payment groups associated with the Order

**Correct Answers: A B**

3: What should you do to prevent errors during submission in the checkout caused by session invalidation?

- A.You set the sessionExpirationURL property of the form handler to redirect the user to an appropriate page after submission.
- B.You ensure that the Profile.securityStatus is not anonymous before rendering the form and if it is anonymous, redirect the user to an appropriate page.
- C.You create a servlet that will check the SessionManager.validSessions property and ensure this session is valid when the form is displayed. If session is invalid, you redirect the user to an appropriate page.
- D.You check the creationTime of the user's session and ensure that the difference subtracted from current time is not greater than the SessionManager.sessionInvalidationTime on the page. If it is longer than the sessionInvalidationTime, you redirect the user to an appropriate page.

**Correct Answers: A**

4: What are two ways to display items in an order in a JSP? (Choose two.)

- A.iterate through the CartModifierFormHandler.productId property
- B.iterate through the CartModifierFormHandler.order.commerceItems property
- C.iterate through the CartModifierFormHandler.order.ShippingGroups property and then iterate through the ShippingGroup.CommerceItems property
- D.iterate through the CartModifierFormHandler.order.ShippingGroups property and then iterate through the ShippingGroup.CommerceItemRelationships property

**Correct Answers: B D**

5: Which two statements about the functions of the ShippingGroupFormHandler are true? (Choose two.)

- A.It allows you to split shipping by line item.
- B.It allows you to split shipping by payment group.
- C.It contains a list of CommerceItemShippingInfo objects.
- D.It loads the ShippingGroupMapContainer with the authorized shipping groups for the current user.

**Correct Answers: A C**

6: What are three main tasks in the PaymentGroupFormHandler? (Choose three.)

- A.create a new PaymentGroup for use in a user's current Order
- B.split extra CommerceIdentifierPaymentInfo objects by amount
- C.handle applying CommerceIdentifierPaymentInfo associations to the current Order
- D.specify a default PaymentGroup to be used for a CommerceIdentifier that is not explicitly assigned to a PaymentGroup

**Correct Answers: B C D**

7: In which two cases is it recommended that you create repository item sub-types or modify the sku repository item rather than use dynamicAttributes? (Choose two.)

- A.when adding multiple attributes to a sku
- B.when using an attribute represented by a number
- C.when defining an attribute that can be different for all SKUs
- D.when defining an attribute that is specific to a small subset of SKUs

**Correct Answers: A D**

8: When would you use the CatalogItemLookupDroplet instead of the ItemLookupDroplet to look up items in a catalog repository?

- A.when you want to search for an item on a gift list
- B.when you want to search more than one repository for an item
- C.when you want to search for an item only from the current user's catalog
- D.when you want to search for a list of possible items that match a specific criteria

**Correct Answers: C**

9: What must you do to sell multiple items as a bundle?

- A.offer a category of products as a SKU
- B.assign multiple SKUs into a product bundle
- C.assign the appropriate quantity of each SKU to a SKU bundle
- D.write a custom shopping cart handler to add related products to the cart when necessary

**Correct Answers: C**

10: When searching custom catalogs, what do you do to ensure that all catalogs are searched if no user catalog is defined?

- A. You do nothing. This is the default behavior.
- B. set the currentCatalog property of the CatalogSearchFormHandler class to the default catalog
- C. set the nullCatalogMeansNoResult property of the CatalogSearchFormHandler class to false
- D. set the catalogPropertyName property of the CatalogSearchFormHandler class to the default catalog

**Correct Answers: C**

11: Which property in the product catalog repository associates SKUs with a particular product?

- A. the product item type's childSKUs property
- B. the category item type's childSKUs property
- C. the sku item type's ancestorProducts property
- D. the product item type's descendentSKUs property

**Correct Answers: A**

12: What three steps must you take to create a catalog template, such as a product information page? (Choose three.)

- A. create a media item repository item
- B. set the catalog item's template property to the URL of the template JSP
- C. design a JSP that displays information about the category, product, SKU, etc.
- D. associate the appropriate media item with the catalog items that will be displayed using the custom catalog template
- E. create a template repository item to hold the JSP fragment for the custom template and link it to the appropriate product category

**Correct Answers: A C D**

13: Which two statements about custom catalogs are true? (Choose two.)

- A. A category cannot contain catalogs.
- B. A product can only belong to one category.
- C. Catalogs can contain one or more subcatalogs.
- D. Each category exists in one and only one catalog.

**Correct Answers: C D**

14: When is a custom catalog required?

- A. when you want a catalog that is easy to configure and provides the best search performance
- B. when you want to modify the list of root categories that will be shown to a specific group of users
- C. when you want to limit searches to a subset of the catalog, such as coats, sportswear, or accessories
- D. when you want to modify the prices of individual products that will be shown to a specific group of users
- E. when you want to be able to modify the list of root categories that are displayed on your home page as your catalog expands

**Correct Answers: B**

15: How do you add a weight property to all of your SKUs?

A.create a new subtype of sku to hold the weight property

B.create a new subtype of sku-info to hold the weight property

C.add the weight property to the existing sku item type and map it into an auxiliary table

D.add the weight property to the existing sku-info item type and map it into an auxiliary table

**Correct Answers: C**
