Exam Code: nr0-014

Exam Name: teradata administration v2r5 exam

Vendor: NCR Teradata

Version: DEMO

Part: A

1: Which statement is true about the TDP command SET MAXSESS?

A.The number of sessions is constrained for the TDP.

B.A change to MAXSESS only takes effect at TDP startup.

C.The allowable values must equal a multiple of the PE session limit.

D.It changes the maximum number of sessions supported by the Teradata server.

Correct Answers: A

2: What enables logons to the RDBMS via the gateway?

A.RUN GTW

B.ENABLE GTW

C.ENABLE LOGONS

D.START SESSIONS

Correct Answers: C

3: What are two benefits of session pools? (Choose two.)

A.Logon times are typically 2-3 seconds faster.

B.The number of sessions a user can log on is controlled.

C.They allow better tracking of when applications log on and log off.

D.If all sessions are active, the next pool is used regardless of the logon string.

Correct Answers: A B

4: What happens when a host group's session limit is exceeded and another user tries to log on?

A.The user's connection is refused and the user receives an error message.

B.The user's connection is refused and the user does not receive an error message.

C.The user receives an error message and is logged on to the next host group.

D.The user does not receive an error message and is logged on to the next host group.

Correct Answers: A

5: What are two effective ways of limiting the growth of the AccessRights table? (Choose two.)

A.assign users to one or more roles

B.grant all privileges at the database level

C.grant all necessary privileges to each user on individual database objects

D.ensure that all users belong to a profile and inherit the profile's access rights

Correct Answers: A B

6: What default value is assigned as the user's default database if no value is specified in the user's profile parameter or the CREATE USER statement?

A.a NULL value

B.database DBC

C.the user's username

D.the default database of the user's parent

Correct Answers: C

7: Which two statements are true about ownership privileges? (Choose two.)

A.They must be explicitly granted.

B.They cannot be explicitly revoked.

C.They cannot be taken away unless ownership is transferred.

D.They can be explicitly revoked by the Database Administrator.

Correct Answers: B C

8: Which statement removes the profile Acct_User from UserA?

A.DROP USER UserA;

B.MODIFY USER UserA AS PROFILE=NULL;

C.REMOVE USER UserA FROM PROFILE Acct_User;

D.MODIFY PROFILE Acct_User AS ACCOUNT=NULL;

Correct Answers: B

9: The database administrator created User A and assigned that user 90 MB of spool. A month later, the database administrator creates Profile B with 50 MB of spool. User A is then assigned to Profile B. Which system view would you use to determine how much spool User A now has access to?

A.DBC.Users

B.DBC.ProfileInfo

C.DBC.SessionInfo

D.DBC.Accountinfo

Correct Answers: B

10: Which is updated when you change password features such as expiration, reuse, minimum and maximum length?

A.DBC.Users

B.DBC.LogOnOff

C.DBC.LogonRules

D.DBC.SysSecDefaults

Correct Answers: D

11: User A creates Database X. Which three rights are automatically granted to User A on Database X? (Choose three.)

A.CREATE USER

B.CREATE TABLE

C.CREATE INDE X

D.CREATE DATABASE

E.CREATE REFERENCES

Correct Answers: A B D

12: Which clause in a CREATE VIEW statement restricts the rows in a table that can be inserted by users?

A.USING

B.WHERE

C.SELECT

D.WITH CHECK OPTION

Correct Answers: D

13: What is the maximum number of levels a role can be nested?

A.one

B.two

C.There is no limit on the number of nested levels.

D.The limit is determined by the default system setting.

Correct Answers: A

14: Which two clauses in a CREATE VIEW statement restrict the rows in a table that can be updated by users? (Choose two.)

A.USING

B.WHERE

C.SELECT

D.WITH CHECK OPTION

Correct Answers: B D

15: A DROP USER command is issued on a user who is assigned to a role. From which two system tables are rows deleted? (Choose two.)

A.DBC.AMPUsage

B.DBC.RoleGrants

C.DBC.SessionInfo

D.DBC.AccessRights

Correct Answers: B D
