Exam Code: 646-573

Exam Name: Cisco Lifecycle Services Advanced

Security(LCSAS)

Vendor: CISCO

Version: DEMO

Part: A

1: Which service component in the plan phase must be finished before Security Readiness Assessment?

A.High Level Design

B.Site Readiness Assessment

C.Detail Design

D.Technology Strategy Assessment

Correct Answers: B

2: Where are the current escalation procedures of the customer typically documented?

A.High Level Design

B.Preliminary Discovery Document

C.Security Readiness Assessment

D.Business Requirements Document

Correct Answers: C

3: For a security solution, which task is associated with the Business Requirements Development service component in the prepare phase?

A.Document Current Topology, Hardware and Software

B.Assess Technical Requirements for the Proposed Security Solution

C.Analyze the Security Solution Integration Requirements with Existing Legacy Platforms

D.Document System Level Functionality

E.Review Security Alerts and Notification Requirements

Correct Answers: D

4: Which task is conducted in the optimization workshop?

A.Conduct User Community/Adoption Absorption Analysis

B.Determine Network Elements That Will Be Tested

C.Review Security Solution Install Guides, Release Notes, and User Guides

D.Review Security Solution Network Availability

E.Verify Network Redundancy

Correct Answers: A

5: Which key task is conducted as part of Problem Management?

A.Remotely Backup Endpoint Solution Configuration and Databases

B.Provide Software Upgrades, Updates, and Bug Fixes for the Endpoint Solution System

C.Conduct Move, Adds, Changes

D.Select Fault Management Tools and Products

Correct Answers: B

6: Which resource is commonly used when a CSA component is installed?

A.Sensor Maintenance Procedures

B.Release Notes

C.Policy Guides

D.Low Level Design

Correct Answers: B

7: Which activity is conducted by using CSA release notes as a resource?

A.Determine CSA Feature and Function Design Specifications

B.Install S/W and Achieve Connectivity

C.Implement Policies and Groups

D.Fine Tune the Custom Policy

Correct Answers: B

8: Look at the picture.

In Staging, what is the correct flow of events for a CSA policies and groups implementation? Click and drag each task from the left to the corresponding step on the right.

Fine Tune the Custom Policy		Step 1
Implement the Customized CSA Policy using CSA Agent Profiler		Step 2
Create one Application Group for each type of Application Environment that needs to be protected		Step 3
Use Default CSA Policy and tune if necessary		Step 4
Implement Policies for each Application Group using a Phased Approach		Step 5

Correct Answers:

In Staging, what is the correct flow of events for a CSA policies and groups implementation? Click and drag each task from the left to the corresponding step on the right.

Fine Tune the Custom Policy		Create one Application Group for each type of Application Environment that needs to be protected
Implement the Customized CSA Policy using CSA Agent Profiler		Implement Policies for each Application Group using a Phased Approach
Create one Application Group for each type of Application Environment that needs to be protected		Use Default CSA Policy and tune if necessary
Use Default CSA Policy and tune if necessary		Implement the Customized CSA Policy using CSA Agent Profiler
Implement Policies for each Application Group using a Phased Approach		Fine Tune the Custom Policy

9: What is the first activity that is conducted in an IPS mode implementation?

A.Create a Rule from a Query

B.Tune for False Positives

C.Install the Sensor, Schedule a Network Outage Prior to the Installation

D.Fine Tune the Custom Policy
Correct Answers: C

10: Which two tasks are associated with the technology strategy meeting in the prepare phase? (Choose two.)
A.Document the Customer's Current and Future Technology Projects
B.Assess Current Security Management Procedures
C.Determine the Security Solution Feature and Function
D.Identify a Set of Systems That Will Be Protected in a Pilot Implementation Based upon Guidelines
E.Document Security Policy Requirements
Correct Answers: A E

11: Which service component should be executed before Change Management?
A.Operation Assessment
B.Operations Setup
C.Operations Design
D.Escalation Process
Correct Answers: B

12: Which two tasks are conducted as part of the assess current security management procedures activity? (Choose two.)
A.Review Security Alerts and Notification Requirements
B.Review LAN/WAN Configurations
C.Review and Generate IP Addressing Scheme
D.Evaluate Escalation Procedure
E.Identify Connectivity Requirements
Correct Answers: A D

13: Which service component is in the operate phase?
A.Configuration Management
B.Operation Assessment
C.Operations Design
D.System Acceptance Test
Correct Answers: A

14: Which activity is conducted as part of the Security Readiness Assessment?
A.Document Logical-Level Functionality
B.Assess and Document Infrastructure Requirements for the Proposed Solution
C.Assess Existing Software Operating Procedures
D.Perform Preliminary Gap Analysis
E.Document Location of Legacy Equipment
Correct Answers: C
