Vendor: Brocade

Exam Code: 143-270

Exam Name: Brocade Certified Fabric Designer 16 Gbps

Version: DEMO

QUESTION 1
You are the project manager of SAN capacity planning. Which three groups should be consulted?
(Choose three.)

A. IT application owners
B. IT application developers
C. facilities management
D. storage and network administrators
E. desktop support services

Answer: ACD

QUESTION 2
Which two variables will determine whether server virtualization should be considered when
implementing a new SAN design? (Choose two.)

A. switch security policy
B. potential for congestion at the target device
C. memory on the physical server
D. available storage capacity

Answer: BC

QUESTION 3
You are planning to migrate a group of locally hosted applications to a remote facility. You will be
using a dedicated long distance FC link. What information should be gathered to fully use the
bandwidth on the port?

A. number of disks on the remote storage system
B. configured SONET packet cache
C. MTU size
D. average frame payload

Answer: D

QUESTION 4
When designing a SAN fabric with a hypervisor in the environment, which two concerns should
be addressed? (Choose two.)

A. the number of Virtual Machines per server
B. the applications used in a Virtual Machine environment
C. the use of Virtual Fabrics
D. the use of Brocade Storage Application Services (SAS)

Answer: AB

QUESTION 5
You are planning a refresh for a large SAN. You will be implementing a combination of Brocade
DCX 8510-4s and Brocade 6510s. The primary requirement is that the SAN be highly available.

What information needs to be collected from the current environment? (Choose three.)

A. number of HBA ports per host
B. average host bandwidth
C. MPIO support for hosts
D. number of storage ports per array
E. number of disks per storage array

Answer: ACD

QUESTION 6
You need to identify key metrics defined in the Service Level Agreement for data restore in a customer's fabric. Which two questions would you ask the customer? (Choose two.)

A. How quickly is the data restored?
B. Which application is used to manage data backup and restore?
C. How quickly is the data backed up?
D. Where is the recovered data located?

Answer: AD

QUESTION 7
A customer wants a design that will allow for increasing the number of ports in their SAN without increasing the number of domain IDs. What is one way to accomplish this?

A. Configure virtual fabrics on the existing backbones.
B. Add Access Gateways to the existing SAN.
C. Increase the number of DCX 8510-4 Backbones using ICLs for connectivity.
D. Add an FCIP connection between two Brocade 7800 switches.

Answer: B

QUESTION 8
You are asked to provide a useful tool for reducing costs when either bandwidth caps or bandwidth usage charges are in place for transferring data between fabrics deployed with a Brocade DCX 8510- 8.Which Fabric OS feature would achieve this?

A. In-flight Data Encryption
B. Traffic Isolation Zones
C. Virtual Fabrics
D. In-flight Data Compression

Answer: D

Thank You for Trying Our Product

Braindump2go Certification Exam Features:

★ More than 99,900 Satisfied Customers Worldwide.

★ Average 99.9% Success Rate.

★ Free Update to match latest and real exam scenarios.

★ Instant Download Access! No Setup required.

★ Questions & Answers are downloadable in PDF format and VCE test engine format.

★ Multi-Platform capabilities - Windows, Laptop, Mac, Android, iPhone, iPod, iPad.

★ 100% Guaranteed Success or 100% Money Back Guarantee.

★ Fast, helpful support 24x7.
