Exam Name: BIG-IP v10.x LTM Advanced Topics V10.x

Version: DEMO

QUESTION 1
Which is a potential result when a trunk is configured on a BIG-IP?

A. VLAN fail-safe is not available for any VLANs associated with any trunks.
B. Packets flowing to the VLAN could arrive on any of the interfaces in the trunk.
C. No additional trunks can be configured since each BIG-IP is limited to one trunk.
D. Since any VLANs associated with the trunk are necessarily associated with multiple interfaces, the VLANs using the trunk must use tagged packets.

Answer: B

QUESTION 2
A site wishes to use an external monitor. Other than what is coded in the monitor script, what information must be configured on the BIG-IP for the monitor to be functional? (Choose two.)

A. BIG-IP must know the name of the program.
B. BIG-IP must know which functions the program is going to test.
C. BIG-IP must know the IP addresses of the devices that will be tested.
D. BIG-IP must know which node or member the results are to be applied to.
E. BIG-IP must know all services that are running on the system to be tested.

Answer: AD

QUESTION 3
A monitor has been defined using the HTTP monitor template. The send and receive strings were customized, but all other settings were left at their defaults. Which resources can the monitor be assigned to?

A. most pools
B. most nodes
C. most virtual servers
D. only specific pool members

Answer: A

QUESTION 4
A monitor has been defined with an alias port of 443. All other options are left at their defaults. The administrator wishes to assign it to a pool of members where the members' ports vary. Which is the result?

A. This assignment is not allowed since the ports do not match.
B. For each member, the monitor will test the member node at port 443.
C. For each member, if the member port is not 443, the member will be marked down.
D. For each member, if it is running an SSL service at the member port, the monitor may work. Otherwise, the monitor will fail and the member.

Answer: B

QUESTION 5
Which statement is true concerning packet filters?

A. Filters cannot prevent access to the management port.
B. Filters cannot prevent the BIG-IP synching process from taking place.
C. The order of filters does not affect which traffic is accepted or denied.
D. In addition to administrator-created filters, there always exists a "deny all" filter that processes traffic last.

Answer: A

QUESTION 6
Could an iRule perform persistence based on a cookie?

A. No. iRules cannot affect persistence.
B. No. Cookie persistence is only based on a cookie persistence profile.
C. Yes. An iRule could be designed to persist based on the contents of a cookie.
D. Yes. An iRule could be designed to persist based on the contents of a cookie as long as the cookie is set by the server.

Answer: C
